

ADOPT-A-PET

Adoption Process

Thank you for considering adopting a dog from Adopt-A-Pet dog shelter. Bringing a new dog into your life is a long-term decision that should be made carefully. Some of our dogs come from unfortunate situations and it is important that we find the right home for each of them, we screen all potential candidates. Our adoption counselors strive to make the adoption process a positive experience for our dogs, you, and your family.

- You must be 21 years or older and present a current photo ID at the time of adoption.
- Complete and submit the online application for the dog that you are interested in adopting.
- The Adoption Staff will review your application, and if approved, a team member will notify you to schedule an appointment to meet the dog.
- All members of the family/household must be present during the visit.
- If you have an existing dog(s), a second appointment is required so that you may bring him/her with you. This ensures that there won't be any problems introducing a new member to your family in your home.
- Adoption Staff may arrange for a home visit prior to the adoption.
- Adopt-A-Pet reserves the right to refuse any application.
- The final adoption decision will be made based on the best match for the dog. This determination will be made after all scheduled adopters have met with the dog and AAP Adoption Staff.
- You are not obligated to adopt any dog and can terminate the adoption process at any time.
- For directions visit our website at www.adoptapet-wa.org.

Adoption Fees: We accept cash, check or credit card for adoption fees.

Puppies (12 months and younger) \$450.00

This includes 2 sets of vaccinations, wormer, flea medications and micro-chip.

Your puppy will need to be spayed or neutered at 6 months. You can make arrangements to have this done by your own veterinarian and will be refunded up to \$150.00 when you provide proof of spay or neuter.

Adult Dogs (12 months and older) \$200.00 and up.

Our adult dogs have had a routine veterinarian check, spay/neuter, current vaccinations, rabies, wormer, flea medications and micro-chip.
